Ads	Rewarded ads the user chooses to watch
Interfaces	Fruit, Tune, Tiles, Command
Account	Not required
Package	com.sgtzaddy.brickos

ONE SENTENCE

BrickOS is a retro Android home launcher that pairs four distinctive interfaces with Brick Lock, a timed app blocker you start yourself.

WHAT IT DOES

BrickOS replaces the usual Android home screen with one of four retro skins, each a working launcher that runs your real apps: **Tiles**, a grid of animated live tiles; **Fruit**, a click wheel and scrolling menus; **Tune**, oversized type, bold colour and a directional pad; and **Command**, a DOS-style command line in five phosphor colours. Brick Lock is the timer: pick how long, pick which apps stay available, and anything else is blocked until it runs out. Schedules can start it automatically.

KEY FEATURES

- Brick Lock: timed, user-started app blocking with an approved-app list, plus schedules
- Phone, keyboard and Android Settings always reachable; ending early means typing out a passage
- Four released skins, including Command in five phosphor colours, with preset palettes, custom accents and light or dark
- Live tiles for music, weather, calendar, photos and unread counts (Tiles)
- No account and no sign-in; settings stay on the device

FREE, WITH AN OPTIONAL UPGRADE

Starting a lock or changing skin spends a credit. Users can earn a credit by watching a rewarded ad when they choose to, and BrickOS hands one back the next day if they run out. A one-time BrickOS Premium purchase removes ads and credits entirely.

PRIVACY AND LOCK GUARD

Optional Lock Guard does the blocking and stays off until the user turns it on in Android Accessibility settings. While a user-started lock is running it checks which app is in front and returns the user to BrickOS if that app is not approved. It does not read screen text, passwords, forms or taps, and it sends nothing anywhere. Contacts (for search) and Notifications (for lock status) are optional permissions.

BrickOS is inspired by classic consumer technology. It is not affiliated with, endorsed by or sponsored by Apple Inc. or Microsoft Corporation.
